Please share with your colleagues:

# STEM for ALL Series: Belonging in STEM

- **Target Audience:** All
- **Term:** Academic Year (February break)
- **Date & Time:** February 19, 2020; 9 am - 3 pm
- **Registration fee:** Free

**Description:** In preparation for National Engineers Week, the STEM Education Center at WPI offers a free professional development focused on making sure STEM is equitable for all students.

This new segment of our “STEM for All” series looks at why a sense of belonging in STEM matters to our students and will cover topics that impact the feeling of belonging including bias on multiple levels and stereotype threat. Look at your classroom and the bigger picture of STEM careers with a whole new lens and better understand where the gaps are, why they exist, and actions that you can take to increase a sense of belonging. You will have the opportunity to reflect on your strengths and build on these to create a more inclusive environment for your students, all while making connections to high quality STEM and design thinking in your own classroom.

**The event is free but requires registration:** Click [here](#) to register.

Email [Donna Taylor](#) with any questions.

**Donna Taylor**

Assistant Director, Professional Development
